Re: MM Docket No. 87-268  
FOURTH FURTHER NOTICE OF PROPOSED  
RULE MAKING AND THIRD NOTICE OF  
INQUIRY

Dear Secretary:

As licensee of K14HR, a low power television station licensed to service Tucson and surrounding areas of Southern Arizona, we are submitting this comment and response to the above mentioned docket.

We wish to state our concern regarding the oversight of "low power television" within Docket 87-268. Such exclusion can potentially devastate the currently active stations now providing a very important service to the communities we serve. Due to the nature of LPTV operation, most stations are their communities exclusive minority programmed service. Furthermore, most stations are primarily small businesses that are locally owned and operated by individuals within the community they serve. The Commission has long recognized the value of low power broadcast with the primary status of Class "A" FM compared to that of Class "C" FM; thus, as a LPTV Licensee we request to be part of the new technology era and an opportunity to continue providing our communities the programming full-power stations do not address.

K14HR (dba KFAM) provides inspirational programming, local events, news and information for the community we serve. K14KR is licensed to Hispanic Broadcasters of Tucson.

Respectfully submitted,

Jay S. Zucker  
President, Hispanic Broadcasters of Tucson
